MISSION SNAPSHOT

Section tag

Our Mission

Headline

Healthcare should never be a privilege. For a child, it's a right.

Body copy

Zera Childcare Foundation was born from a simple but urgent question: what happens to a child whose parents cannot afford treatment when illness strikes? We exist to answer that question — with action. We work directly in government hospitals across Lagos, paying medical bills, funding surgeries and medications, and ensuring that no child is turned away from the care they need simply because of what their family can or cannot afford.

WHAT WE DO

Section tag

How We Help

Headline

Real intervention. Real impact.

Card 1 — Hospital Outreach

Title	Hospital Outreach Programme

Body	We visit the paediatric unit at LASUTH and other government hospitals, identifying children from low-income families who need urgent medical support. We pay bills, fund surgeries, and provide medications so treatment is never delayed.

Card 2 — Special Needs Support

Title	Special Needs Intervention

Body	We support children with special needs from underserved communities — particularly those who need timely intervention to improve their quality of life. Speech therapy, occupational therapy, and specialist care, made accessible.

FEATURED STORY

Section tag

> *A Life Changed*

Story headline

> *She couldn't walk. Then she could.*

A child. An operation. A foundation that showed up.

“The child's mum was so distressed. But because of this foundation — last time I called, she said the child is walking fine now.”

— Nurse Chukwura, LASUTH Paediatric Unit

After a surgery that left a young girl unable to walk, her family had nowhere to turn. Zera Childcare Foundation stepped in — funding her treatment and follow-up care. The same foundation also helped a child who suffered from recurring seizures regain a life free of them. These are not isolated cases. They are what happens when someone decides to show up.

Page 2 — About Us

Story. Purpose. Values. People.

PAGE INTRO

Page headline (H1)

We exist because every child's life matters.

Intro paragraph

Zera Childcare Foundation is a Lagos-based non-governmental organisation committed to ensuring that vulnerable children receive the medical care they need — regardless of what their families can afford. Founded in 2021, we have supported over 68 children and counting, working directly within government hospitals to intervene where it matters most.

OUR STORY

Section headline

Born from compassion. Built on purpose.

Zera Childcare Foundation did not begin with a strategy. It began with a question — a question that refused to go away: What happens to children whose parents cannot afford treatment when illness strikes?

That question became a calling. In 2021, the Foundation was established to stand in the gap for vulnerable children and their families — to ensure that a child's chance at life is never reduced to a matter of finances. Today, we operate with hands-on presence in government hospital paediatric units across Lagos, carrying that original calling forward one child at a time.

MISSION & VISION

Our Mission

Creating a platform where support is provided for vulnerable children to access the healthcare they need and deserve.

Our Vision

A world where every child has a chance to live — where illness is met with care, not helplessness, and where no family faces a medical crisis alone.

CORE VALUES

Section headline

What guides everything we do.

Transparency	We are open about where every naira goes. Donors, partners, and families can trust that our resources go directly to the children who need them.
Service with honour	We serve not out of obligation but out of deep conviction. Every child we support is treated with dignity — not as a recipient of pity, but as a life worthy of the best care available.
Faith in God	Our foundation is rooted in the belief that every human life is sacred and worth fighting for. This faith drives our commitment and sustains our work even when the need feels overwhelming.

WHO WE SERVE

Section headline

Children who need us most.

> *We focus our support on children aged 0–17 from low-income families who are currently receiving treatment in government-owned hospitals in Lagos State. We prioritise children who require medical interventions that are treatable or manageable — surgeries, medications, diagnostic tests, and scans — and families who have been unable to pay outstanding hospital bills even after discharge.*

TEAM

Section headline

> *The people behind the mission.*

> *[Team bios and photos — to be supplied by client]*

Page 3 — Programmes

What we do. How we do it. Who qualifies.

PAGE INTRO

Page headline (H1)

We don't wait for change. We go where the need is.

At Zera Childcare Foundation, our programmes are built around one principle: direct, hands-on intervention. We go into government hospitals, sit with families, assess needs, and act. No red tape. No long waiting lists. Just support, delivered where it is needed most.

PROGRAMME 1 — HOSPITAL OUTREACH

Programme name (H2)

Hospital Outreach Programme

Programme tagline

At the bedside. When it matters most.

Our flagship programme operates primarily at the Lagos State University Teaching Hospital (LASUTH) Paediatric Unit — one of the busiest government hospitals in Lagos. Our team regularly visits the wards, identifying children from vulnerable families who cannot afford the cost of treatment.

Surgeries	We fund emergency and scheduled surgical procedures for children whose families cannot bear the cost.

Medications	We purchase essential medications that families are unable to afford, ensuring no child goes without treatment.
Tests & Scans	We cover the cost of medical investigations — blood tests, scans, and diagnostics — critical to accurate diagnosis and treatment.
Unpaid Bills	We settle outstanding hospital bills for children who have been medically discharged but remain in the ward because their family cannot pay.

PROGRAMME 2 — SPECIAL NEEDS

Programme name (H2)

Special Needs Intervention Programme

Programme tagline

Every child deserves to thrive — not just survive.

For children living with special needs in underserved and remote communities, access to specialist care is often non-existent. Our Special Needs Intervention Programme bridges this gap, connecting children with the therapy and specialist support that can meaningfully improve their quality of life.

We focus particularly on timely interventions — because for many conditions, early support makes the difference between a child who develops fully and one who is left behind. Our current focus areas include speech therapy and occupational therapy, delivered through partnerships with qualified professionals.

WHO QUALIFIES

Section headline

Does your child qualify for support?

We support children aged 0–17 years who are currently receiving treatment in government-owned hospitals in Lagos State, from families with limited financial means. If your child requires a surgery, medication, diagnostic test, or has an unpaid hospital bill preventing their discharge — we want to hear from you.

Page 4 — Impact

Numbers. Stories. Proof of purpose.

PAGE INTRO

Page headline (H1)

> *68 children. 68 reasons we do this.*

> *Every number on this page is a child. A family. A moment where a life could have gone the other way — and didn't, because someone chose to show up. Since 2021, Zera Childcare Foundation has been that presence. Here is what it has looked like.*

SUCCESS STORIES

Section headline

> *Lives changed. Families restored.*

Story 1

> *Story title: She walked again.*

Story body: A young girl came through surgery — but the operation left her unable to walk. Her mother was distressed and had nowhere to turn. Zera Childcare Foundation stepped in, funding her treatment and ongoing care. Months later, her mother called with news that moved everyone: her daughter was walking again. Around the same time, the Foundation helped another child who had lived with recurring seizures. With the right medication funded and treatment sustained, that child has been seizure-free.

> *I really appreciate your kindness — it is something beautiful. There's a child that was operated upon. She could not walk again after the operation. The child's mum was so distressed. But because of this foundation, last time I called, she said the child is walking fine now. There was another child that always had seizures — as a result of the help this foundation rendered, the child is clear of seizures. God is truly using this foundation.*
>
> **— Nurse Chukwura, LASUTH Paediatric Unit**

[Dev note: Use full quote. Can be displayed as a pull quote alongside or below the story body.]

Story 2

Story title: Four years of faithfulness.

Story body: Jennifer's mother remembers exactly when Zera Childcare Foundation first came to the hospital in 2021. There were moments when money for treatment simply wasn't there — and each time, the Foundation stepped in. Today, Jennifer doesn't even look like someone still recovering. She takes her medication regularly and is doing well. For her mother, it is simply a testament to what God can do through people who care.

> *God has been faithful. This started in 2021 — they came to help us in the hospital. Whenever there was no money for the treatment, they stepped in. Since then, my child has been doing quite well. She takes her drugs regularly; she doesn't even look like someone that's still recovering from an ailment. God will bless you people greatly.*
>
> **— Mummy Jennifer**

[Dev note: Warm, faith-centred testimonial. Works well as a pull quote on the Impact page.]

Story 3

Story title: Baby Praise — a family held through the hardest season.

Story body: In 2021, Janet's three-year-old daughter Praise was admitted to Ikeja General Hospital. For six months, doctors ran test after test, and the costs mounted beyond what the family could track. Zera Childcare Foundation was there — funding every test, every medication, including a critical antibiotic that cost more than most families earn in a month. Despite everything, Praise passed away. But the Foundation's presence through that season meant the family was never alone, and never without support. In her own words, Janet gave thanks — because even in grief, they were held.

IMPORTANT NOTE FOR CLIENT: Please confirm you are comfortable with this story being used publicly, and confirm how you would like the child to be referenced (name used or alias). This is a sensitive story that also reflects the depth of your work — supporting families even in loss.

> *“*
>
> *They are the ones God used to give us the money to do series of tests, buy drugs and buy an antibiotic which is very expensive. In all things, we give thanks to God. I say a big thank you to the foundation — forward ever, backward never.*
>
> **— Mrs Falolu (Janet), mother of baby Praise**

[Dev note: Sensitive story. Needs client approval before publishing. Consider shortening the quote if full context is not shown.]

Story 4

Story title: More than medicine — they checked up on us.

Story body: For David's mother, what stands out is not just the medication Zera Childcare Foundation bought for her son — it is that they called to check up on him afterwards. In a world where charity often ends at the transaction, this family experienced something different: people who kept showing up. Today, David is feeling better. And his mother's prayer is simple — that God rewards every good thing done for her son.

> *Everyday, I am blessing these people from my heart. They are selfless. I want to thank them so much for helping my child and buying the drugs for him. They call to check up on us — my child is feeling better. Every good work has its reward, and I may not be able to pay you back, but my God will reward you.*
>
> **— Mummy David**

[Dev note: This testimonial highlights the relational, follow-up aspect of the Foundation's work — great for the About Us page too.]

Story 5

Story title: Chisom is okay now.

Story body: Chisom was a patient at LASUTH when Zera Childcare Foundation came through. Her mother watched as the Foundation worked what she calls a miracle. Chisom no longer complains of pain — she is doing well. Her mother's words, in her own voice, say everything: they were there, they helped, and because of them, Chisom is okay.

> *Na God dey do am. For LASUTH wey Chisom been dey, God do miracle. God use them to help us. Now, Chisom is doing better — she no dey complain, no pain, nothing. She dey okay. Thank you very much, una too try.*
>
> **— Mummy Chisom**

[Dev note: Original quote is in Nigerian Pidgin. Keep it as-is — it is authentic, relatable, and powerful. Do not translate or alter it. Pair it with the English story body above.]

HOW WE MEASURE IMPACT

Section headline

Accountability is part of our DNA.

We measure success not in events run or funds raised, but in health outcomes. A child supported by Zera Childcare Foundation is a success story when their condition is treated before complications set in — when early intervention prevents something manageable from becoming something devastating.

We track every case: the child, the diagnosis, the intervention provided, and the outcome. We believe that transparency in impact is not optional — it is the foundation of trust.

Page 5 — Donate

Make it personal. Make it urgent. Make it easy.

PAGE INTRO

Page headline (H1)

> *One act of generosity. One child's future.*

> *Right now, in a government hospital in Lagos, a child is waiting. Waiting for a surgery their family cannot afford. Waiting for medication that costs more than their parents earn in a week. Waiting for someone to bridge the gap. Your donation closes that gap. It pays a hospital bill. It funds a surgery. It gives a child a fighting chance at life.*

WHY IT MATTERS

Section headline

> *Where your money goes.*

100% to children	Every donation goes directly to covering medical costs for the children we support. We operate with lean overheads and full accountability.
Immediate impact	When you donate, we deploy the funds quickly. There is no lengthy approval process — a child in need gets help as fast as possible.
Full transparency	We track and report every naira. Donors receive updates on how their contributions have been used.

DONATION TIERS (SUGGESTED)

Section headline

Every amount makes a difference.

₦5,000	Covers a child's essential medication for one treatment cycle.
₦20,000	Funds a diagnostic scan or series of medical tests.
₦50,000	Pays off an outstanding hospital bill, freeing a child to go home.
₦100,000+	Contributes toward funding a surgical procedure.

Donation tier amounts to be confirmed by client before going live. These are suggested figures.

BANK DETAILS

Section headline

How to donate.

[Bank name, account name, account number — to be provided by client.]

Transfer reference	Please use your name as the payment reference so we can acknowledge your gift.
GoFundMe	Online giving link — to be added once set up by client.

CORPORATE GIVING

Section headline

Partner with us as an organisation.

Businesses and corporate organisations play a powerful role in transforming communities. If your company is looking for a meaningful CSR partnership, we would love to work with you. From sponsoring a hospital outreach to funding a child's surgery, your organisation can make a direct, measurable impact on the lives of children in Lagos.

TRANSPARENCY NOTE

Our promise to you

Zera Childcare Foundation is committed to full transparency in how every donation is used. We do not believe in charity for the sake of it — we believe in dignified, accountable service. When you give, you will know where it went.
